**Enabling Devices Introduces
Two Innovative and Very Affordable Communicators**

Hastings-On-Hudson, NY – April 25, 2006 – Enabling Devices announces that it has developed two unique, state-of-the-art augmentative communicators, the **Talk 4** and **Talk 8**. Both are powerful communication tools loaded with numerous innovative features yet are very affordable. They compare favorably with devices costing three times as much.

According to Steven Kanor, the President of Enabling Devices, “we are thrilled to introduce these new communicators. With the advice of many experts, we have combined the most important features into one communication device. For instance, speech therapists have been asking for two switch scanning – our new **Talk 8** now has this capability.”

Enabling Devices Engineer Peter Eagleton describes the **Talk 4** and **Talk 8**: “The **Talk 4** has 12 levels and single switch auto scanning with LED illumination. The **Talk 8** has 12 levels and two-switch scanning. The **Talk 8** also has three additional scanning modes: Automatic, Inverse and Step. Each device features “true voice” recording and is rugged, reliable, lightweight and portable.”

Gail Cocciardi, Director of New Product Development, states that “it was our goal to provide the market with truly innovative communicators at affordable prices. Innovations include a recordable level announcer, an ergonomic 25° angle which provides easy access for the user, on/off auditory cueing, and a light touch switch membrane. Even with more than a dozen features, these communicators are one-third the cost of our competitor’s communicators with similar capabilities.”

Enabling Devices is a company dedicated to developing affordable learning and assistive devices to help people of all ages with disabling conditions. The company specializes in creating custom devices for individuals with severe disabilities. Founded by Steven E. Kanor, Ph.D. and originally known as Toys for Special Children, the company has been creating innovative communicators, toys, and switches for the physically challenged for more than 30 years.
