

1. Before printing this template, make sure your page scaling is set to NONE and print orientation is set on LANDSCAPE.
2. Print or copy your Icon sheet onto a piece of 8 1/2" by 11" sticky backed label paper.
3. Cut out the Icons you need, peel off the backing and press it in place within the Icon template guidelines. Make sure the Icon square sticker edges are completely flat.
4. Cut your Icon strip out along the dotted lines. When inserting your icon strip into the communicator hold down the leading edge so it will not get caught on the cell dividers. If needed, a thin laminate sheet such as those used to protect book covers may be applied over your icon strip to protect it.
