### Easy mounting for Light Panels!

Our Track System is specially designed for our Touch Light Panels. Each system contains two tracks for mounting up to three Light Panels. Just mount both tracks on the wall, and slip in one to three panels. The system allows for quick and easy repositioning of the panels. Buy two sets of tracks to mount all six panels. *Size: 45½"L x 1"H x ½"W. Weight: 1¼ lbs.*

1. The Track System comes in two parts, each rail or track system will hold a total of 3 of our Touch Light wall Panels. The first thing you need to do is make sure that the 4 mounting screws which are already installed on the back of each Light Panel are properly adjusted so the Light Panels can move freely in the Track System. Using a Phillips Head screwdriver turn the screws out just enough that the Track can slide freely when the screws are inside the groove on the Track itself. (See Photos).

2. Once you have adjusted the screws on the Light Panels you can mount the Tracks on the wall. **Please Note:** Mounting hardware is not included. You can use standard wall anchoring hardware found at hardware stores and Home Improvement Centers. Please consult one of their hardware associates for the proper mounting hardware based on your wall construction and mounting application. The first thing you will want to do is mark the location of each rail and screw holes before drilling (Please see included diagram). Use a level to make sure each Track is level before making your marks. The space between each track needs to be 10.25 inches apart. This distance must be the same at both ends of the tracks for a proper and secure fit of the Light Panels.

3. Once you have made all your markings using a drill bit, drill all your mounting holes. Make sure you are using the proper size and type of drill bit for the type of material you are drilling into, also make sure there are no electrical, water or gas lines directly behind your drilling marks. Install your wall anchors following the manufactures installation instructions.

4. Once the Tracks have been mounted you can slide each Light Panel into the Track System.

#### Care of the Unit:

The Track System can be wiped clean with any household multi-purpose, non-abrasive cleaner and disinfectant. We recommend Simple Green, which is a non toxic biodegradable all-purpose cleaner.

**Do not use** abrasive cleaners, as they will scratch the surface of the unit.
