Tell the ones you love just how much you love with Liam the Peacock. Squeeze his wing or activate your external capability switch (not included) and Liam bursts into song, singing “L-O-V-E,” the song made famous by Frank Sinatra. Liam flaps his heart-shaped wings emblazoned with LOVE and sways to the music as he sings. He’ll take your heart but he won’t break it! Liam serenades you for a full minute or until you press the switch again. Has an on/off switch on the battery case for additional control. Size: 12¼"L x 8"W x 10½"H. Requires 3 AAA Batteries. Weight: 1 lb.

Operation:

1. Liam requires 3 AAA batteries (Not included) to operate. Use alkaline batteries only (e.g. Duracell or Energizer brand). Do not use rechargeable batteries or any other type of batteries because they supply lower voltage and the unit will not perform properly. Never mix old and new batteries together or different brands or types together.
2. The battery compartment is located on the bottom of Liam, under the Velcro flap. Using a Phillips head screwdriver open and remove the batter cover. Next install 3 AAA batteries paying close attention to proper battery polarity.
3. Replace the battery compartment cover and secure it with the screw. Set the ON/OFF switch to ON.
4. Connect Liam to any external capability switch (not included) via the jack located at the end of his cord. Liam is equipped with a 1/8" jack for use with external capability switches with a 1/8" plug. Make sure you have pushed the switch plug all the way in. There should be no gaps.

5. Actuate your external capability switch or squeeze Liam’s Musical Note (wing) and he bursts into song, singing “L-O-V-E,” the song made famous by Frank Sinatra. Liam flaps his heart-shaped wings emblazoned with LOVE and sways to the music as he sings. He’ll take your heart but he won’t break it! Liam serenades you for a full minute or until you press the switch again.

Troubleshooting:

Problem: Liam does not function correctly.

Action #1: Replace the batteries paying close attention to proper battery polarity.

Action #2: Make sure that the connection between the external capability switch is pushed in all the way. There should be NO gaps.

Action #3: Try your switch with another switch operated toy/device in an effort to rule out your switch as the source of the problems.

Care of Unit:

If you will not be using Liam for an extended amount of time, we recommend removing the batteries.

Do not submerge the unit in water, as it will damage the electrical components. Liam is surface washable only.
